

Q2 2019 Company Presentation

Safe Harbor Statement and Disclosure

This presentation contains forward-looking statements. These statements are made under the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by terminology such as "will," "expects," "anticipates," "future," "intends," "plans," "believes," "estimates," "targets," "confident" and similar statements. Among other things, statements that are not historical facts, including statements about 51job's beliefs, expectations and business outlook in this presentation, as well as 51job's strategic and operational plans, are or contain forward-looking statements. 51job may also make written or oral forward-looking statements in its periodic reports to the U.S. Securities and Exchange Commission, in its annual report to shareholders, in press releases and other written materials and in oral statements made by its officers, directors or employees to third parties. All forward-looking statements are based upon management's expectations at the time of the statements and involve inherent risks and uncertainties. A number of factors could cause actual results to differ materially from those contained in any forward-looking statement, including but not limited to the following: execution of 51job's strategies and business plans; behavioral and operational changes of enterprises in meeting their human resource needs as they respond to evolving social, political, regulatory and financial conditions in China; introduction by competitors of new or enhanced products or services; price competition in the market for the various human resource services that 51job provides in China; acceptance of new products and services developed or introduced by 51job outside of the human resources industry; risks related to acquisitions or investments 51job has made or will make in the future; accounting adjustments that may occur during the quarterly or annual close or auditing process; fluctuations in the value of the Renminbi against the U.S. dollar and other currencies; and fluctuations in general economic and business conditions in China. Further information regarding these and other risks are included in 51job's filings with the U.S. Securities and Exchange Commission. All information provided in this presentation and in the attachments is as of the date of the presentation and based on assumptions that 51job believes to be reasonable as of this date, and 51job undertakes no obligation to update any forward-looking statement, except as required under applicable law.

To supplement the consolidated financial statements presented in accordance with US GAAP, the Company uses non-GAAP financial measures to exclude share-based compensation expense, gain/loss from foreign currency translation, convertible senior notes issuance costs, change in fair value of convertible senior notes and change in fair value of zero-strike call options, as well as the related tax effect of these items. The Company believes excluding these items from its non-GAAP financial measures is useful for its management and investors to assess and analyze the Company's core operating results as these expenses are not directly attributable to the underlying performance of the Company's business operations and may not impact its cash earnings. The Company also believes that excluding these expenses are important in helping investors to understand the Company's current financial performance and future prospects and to compare business trends among different reporting periods on a consistent basis. The presentation of these additional measures should not be considered a substitute for or superior to GAAP results or as being comparable to results reported or forecasted by other companies.

The facts and statistics used in this presentation relating to the human resource services industry and economy in China are derived from various government and institute research publications. While 51job has taken reasonable care to ensure that these facts and statistics presented are accurately reproduced from such sources, 51job has not independently verified them. These facts and statistics may not be comparable to similar facts and statistics collected for the industry or economy in the United States and other countries.
